

IT/Telecom Structured Cabling Systems Designer All Offices / Other major cities

Background

The Sextant Group, Inc. is a national independent consulting firm offering planning, design and consulting services in a wide range of specialty areas including: audiovisual, IT/telecommunications, building security, technical lighting, medical equipment, and architectural acoustics/noise vibration.

Job Description

The IT/Telecom Structured Cabling Systems Designer's role is to provide a wide range of consulting and design services related to telecommunications and information technologies. The position will require that the candidate actively participates in and manages several projects at the same time while ensuring efficiency, accuracy and top quality work is being delivered to our clients.

As a project design team leader, would you excel in these roles?

- ✦ Key contributor within a project design team, bringing a future-perspective of technology
- ✦ Devise cost-effective solutions, specifically optimized for the user, which may include: Entrance Facilities, Telecomm Rooms, pathways and other infrastructure; wired/wireless and copper/fiber Structured Cabling Systems to support voice/data/video applications; Outside Plant; Distributed Antenna Systems, Data Center technologies and other leading-edge IT/Telecom solutions
- ✦ Develop high-quality information technology related infrastructure construction drawings, details, cost analysis and specifications language
- ✦ Collaborate with MEP and architectural team members and guide clients through the technology selection process
- ✦ Review submittals and shop drawings, coordinating with architects, contractors, engineers, and consultants
- ✦ Perform site walk-through to review adherence to standards and procedures
- ✦ Stay abreast of emerging technologies products/services, guidelines, standards and their applicability to potential projects
- ✦ Ensure that all work is completed on-time, in-budget, and consistently within The Sextant Group's high standards of quality

Does this describe you?

- ✦ Three years consulting experience in the design and implementation of telecommunications systems, spaces and cable plant projects
- ✦ Intimate knowledge of services, hardware, infrastructure and systems architecture for IT
- ✦ Excellent attention to detail and outstanding communication skills, both oral and written
- ✦ Values that include integrity, accountability and a willingness to have fun
- ✦ Works equally well as an individual contributor or team member
- ✦ Maintains a professional and positive attitude in a fast paced and occasionally high pressure environment
- ✦ Proficiency in AutoCAD ADT-2015 / Revit 2015 or later, Microsoft Office 2010 or later, including Word, Excel & Outlook
- ✦ BICSI Certification (active RCDD or test-ready; ITS Installer-1, or ITS Installer-2; additional certifications including OSP, WD)
- ✦ PLUSES: Physical Security System design experience, Health Care experience, PE, additional industry certifications

All candidates must be driven to satisfy the needs of end users and have the ability to deliver high caliber end results in a timely manner while operating without direct supervision. Some overnight travel may be required. Compensation offered is commensurate with experience, and includes excellent benefits package with medical, dental, long term disability, 401K. EOE

All interested candidates should send resume, cover letter and salary requirements in a single PDF file to HR@thesextantgroup.com, with the email subject line "IT/Telecom Structured Cabling Systems Designer – (Candidate Name)". No calls please.
